Storage

The material base-A and hardener-B should be stored in a dry place, in the sealed original container, at temperatures between +2°C and +40°C. Under these storage conditions, the shelf life is a year. The product should not be exposed to direct sunlight.
Stir well before use!

Post Cure Conditions

The curing time is 4 hrs at 60°C, followed by ramping up the temperature for 2 hrs at 80°C, 2 hrs at 100°C, 2 hrs at 130°C & 2 hrs at 160°C.
