Subject: Visit to the Massivit booth at IBEX 2021
Attachments: Massivit 10000 Brochure.pdf

Hi Erica,

As a quick follow up to my phone call, I'm the Composites Sales Manager – USA for the Massivit 10000 3D printer. You visited our booth and have interest in the Massivit 10000's ability to 3D print isotropic epoxy molds for composite part production.

I have attached the Massivit 10000 for your records.

3D printing production molds in days vs. weeks can save Chris Craft time and money, let me know a few times the week of November 8th that work for you, and we'll set up a meeting to visit you and your team to explore this new groundbreaking technology with Chris Craft and if it makes sense to continue or part as friends

Thanks,

Michael Clark
