COVER LETTER

I have extensive experience and relationships in digital print, large format color and 3D print industries at the sales, production and executive levels. Beginning my career at Xerox Corp exceeding quota by selling digital print equipment to commercial clients and 10 years at NRI (now called BluEdge) a reprographics firm with a big investment in large format color my career has been embedded within the print industry.

At NRI, I used my passion for technology solutions to build a 3D print business from zero revenues in 2008 to a multi-million-dollar high powered service bureau and highly leveraged and sought after equipment solutions business today. NRI is one of the few if any that have both Stratasys and 3D Systems reseller status. Our 3D clients varied from architects, branding agencies, industrial designers, manufacturing, product design, television and movies, memorabilia, and others.

Please see my CV for details on my accomplishments and my proven ability to lead, manage and build a business.
